

what is a **parts** interpreter?

Making the right call on the correct automotive part requires a keen eye and uncommon intelligence. Getting it wrong could be catastrophic. Have you got what it takes to get it right first time, every time?

You will:

- identify vehicle makes and individual componentry
- review catalogues or computer databases to identify and locate required parts
- prepare invoices and other finance paperwork for the sale of stock
- collect, pack, dispatch or deliver ordered parts
